IntelliVoice™

Voice Synthesis Module AVAILABLE SOON

Now Intellivision talks to you. IntelliVoice is an all-new Intellivision feature — a voice synthesis module. It generates human-sounding voices which become an essential part of the game play. You concentrate on the visual action while your IntelliVoice component keeps you aware of depleting energy levels, shield damages, and attacking fighters.

Voices that sound human. IntelliVoice produces voices with personality. All instructions, directions and announcements are crisp and clear. IntelliVoice is your computer voice partner in game play.

Not just effects. Voices generated by IntelliVoice give you important game playing data. The IntelliVoice comes in throughout the game, keeping you informed at all times.

Added realism. The IntelliVoice feature adds important new dimensions in realism. For example, IntelliVoice seems to put headphones on you as you command a B-17 Bomber over enemy territory, contending with attacking fighters, navigation requests, and tower instructions.

Easy add-on installation. The IntelliVoice unit simply plugs into the cartridge outlet on your Intellivision Master Component. IntelliVoice cartridges simply plug into the IntelliVoice unit.

Special IntelliVoice cartridges are required to operate the module and add human voice to game play. (Regular Intellivision cartridges may also be plugged directly into the IntelliVoice unit and will give you game play without voice, as if they were plugged directly into the Master Component.) Look for these specially marked game cartridges with the IntelliVoice feature wherever Intellivision is sold.

SEA BATTLE™

Destroyers, battleships, submarines, minesweepers, and aircraft carriers! You're the Admiral, and your mission is to rid the seas of the enemy fleet.

Start by setting a strategy. Lay invisible minefields where you think the big enemy ships will travel. But be careful, because the other Admiral is laying mines to foil you...

Battle stations! Now you slug it out with shells, torpedoes, and naval tactics. Sleek battleships are waiting to pounce on sluggish minesweepers. You can't relax for a minute.

But who worries about the torpedoes, you say. Full speed ahead!

ARMOR BATTLE®

Dust off your field glasses and scan the horizon for enemy tanks. There's one — grinding its way out of the woods!

You see each other at the same time. Both turrets swing toward their targets. Who will fire a split second sooner? And who will be reduced to a pile of rubble?

When you've beaten your opponent, move on to a new battlefield. There are literally hundreds of new terrains to conquer!

War may be nerve-racking, but this is pure fun!

FROG BOG™

(Available soon)

Sitting upon two lily pads in the middle of a lily pond are a pair of hungry frogs; one for you, one for your opponent. Overhead swarm delicious flies. Whether or not your frog scores his dinner while you rack up points is entirely up to you. You control the height and

direction of his jump; even the flick of his long pink tongue. Leap too high or at the wrong angle and "Pl-op" your frog goes into the pond. He must swim back to his lily pad, taking away valuable scoring time while your opponent goes on racking up points.

As play continues, night will come to the pond. Or, you can choose to play the entire round at night, leaping for fireflies — in the dark.

- One or two player game
- Continuous scoring
- Screen changes from day to night

action is only half the game, you have to use your wits too. Quick action and smart strategy will help you defend against the Evil Blue Warriors.

- One player game
- Intense strategy and action
- Ricocheting discs

TRON II**†† (Available soon)

You start out inside the electron stream of a cold efficient and deadly alien-computer. Your objective is to penetrate its inner defenses before it seeks you out and destroys you. You must disable the alien-computer's Central Processing Unit. Sounds easy. But, you have to travel through the integrated circuitry of the very computer you're out to disable — undetected. Make the slightest miscalculation and the alien-computer will seek you out with "messenger bits". You can avoid a "bit" but the alien-computer relentlessly probes for your presence. The closer you get to the sensitive CPU, the more alert, even more aggressive the alien-computer becomes. The question is: Who's the smartest, computers or humans? You'll need good reaction time and almost flawless logic to beat the alien-computer.

- One player game
- Challenge increases as the game progresses

This is a game of lightning quick strategic decisions. Hesitate...or slip...and you'll find yourself surrounded.

TRIPLE ACTION™

It's three classic video games in one!

Racing Cars — You and your opponent race against the clock down a crowded highway.

Battle Tanks — It's a duel to the finish between two heavy tanks. One of you will end up as scrap iron.

Biplanes — It's a thrilling dogfight — biplane style! Watch out for the control tower...don't get lost in the clouds. But most of all, watch out for that blood thirsty baron with a leather cap!

NFL* FOOTBALL

The whistle blows! The crowd roars! The two teams sprint onto the field and line up for the opening kickoff.

Your ball, first and ten on the twenty yard line. Will you grind out the yardage on the ground...or risk a long bomb for a quick score? You and your opponent can choose from over 180 offensive and defensive plays — so it's as much a game of strategy as execution.

Two full halves of fun. With all the refinements of passing, punting, end runs and razzle-dazzles. The computer keeps track of time and score, and the crowd lets you know what it thinks of your performance.

- Two players
- Call realistic offensive and defensive plays
- Scoreboard monitors downs, yards to go, time outs, time remaining, and score

* Trademark used under license from designated owner.

MAJOR LEAGUE* BASEBALL

The crowd roars as the nine man home team sprints out onto the field. Then you and your opponent use all the tricks in the book to score the winning run.

You control all the action — balls and strikes, hit and run, double plays and stolen bases. And it's not over until the last out of the ninth inning!

- Two players
- Nine full innings
- Control pitching, fielding, base running, batting

* Trademark used under license from designated owner.

NBA* BASKETBALL

Two teams square off at mid-court. Up they go for the jump ball. It's tipped to your team. You fake, drive, and move in for a slam dunk!

Each three man team of remarkably realistic athletes can dribble, pass in any direction, jump, block, steal...even take a casual set shot when they've caught the other guys napping.

Four action-packed quarters—plus overtime when needed!

- Pass, steal, rebound, fast break, jump or set shot
- Two players
- 24 second clock

NHL* HOCKEY

Your opponent has a man in the penalty box, so it's time to push hard on offense. There's the whistle! Time to move down the ice.

Your team moves toward the opposing goal in perfect formation, nudging the puck back and forth as defenders move in.

You're across the blue line. You send a pass across the front of the goal, then... wham! a screaming slap shot whips past the goalie and in for the score.

The crowd roars its approval. And the buzzer announces the end of the game. You won! A little practice and you'll be ready for the big time.

- Two players
- Face offs, trapping, interception, penalty box

* Trademark used under license from designated owner.

NASL* SOCCER

A well executed drive down the soccer field is a thing of beauty. The man with the ball jukes, whirls, passes to his teammate. The teammate dribbles toward the goal until he attracts a crowd of opponents. Then he passes to a third man who sets up the score.

The game action is as realistic as the excitement of Pro Soccer—minus the black 'n blue shins.

- Two players
- Corner kicks, goal kicks, free kicks
- Realistic action and sound effects

*Trademark used under license from designated owner.

TENNIS

Thunk! You send a screaming serve across the net. Your opponent races to intercept it and returns a lofty lob into your deep backcourt. You get to it in time to send a smashing ground shot just out of reach of your opponent's outstretched racquet.

- Two players
- Full three set matches
- Control ball velocity and placement

Play an entire three set match, and each game will be different and exciting. You control ball placement, velocity and strategy. And it's a game of wits as well as of dexterity.

Even the crowd gets in the act by turning their heads to follow the ball—and cheering at just the right time.

PGA* GOLF

Stand steady at the tee...head down...slow backswing. Now, drive your tee shot 220 yards down the fairway, splitting a pair of sandtraps. Loft a five iron onto the green. And sink a twenty foot putt for a birdie!

You control the swing and aim throughout 9 championship quality holes. The fairways and greens are beautifully manicured, but the sand traps are deep... and the rough is... rough!

- Up to four players
- 9 holes
- 9 clubs
- Realistic sound effects

*Trademark used under license from designated owner.

U.S. SKI TEAM* SKIING

Take a deep breath, dig your poles hard into the snow, push off... and you're speeding down a world class slalom course.

All the excitement of the Winter Olympics on a beautiful video snowscape.

- Up to six players
- Downhill and slalom course
- Jump moguls, edge through turns, race downhill

There's the bell! You're playing at championship speed, so the action is lightning fast. Feint, duck, block, then move in for a quick combination.

Remember that your fighter is using up precious energy. And each punch he takes has its toll. So use your brains as well as your brawn — and keep your warrior in shape to go 15 rounds.

- Two players
- Four skill levels
- Six different boxers
- 15 rounds, KO's, point decisions, endurance limits

PBA* BOWLING

Warm up by picking up some tricky spares. Now you're ready for ten frames of championship bowling. Select the ball weight you prefer. Decide how "slick" you want the alley. Take a few deep breaths and...you're up!

The faster you push your race car, the more alert you have to be. You may slide off the track and into a maze of grass and trees. You may find yourself skidding into a pond. Or you may find yourself halfway through a hairpin turn before you know it.

Whether you race against an opponent or against the clock, there are thrills enough for anybody.

*Trademark used under license from designated owner.
