In this richly textured adventure, you help the shipwrecked Prince Alexander make his way through a series of mysterious islands. Each island holds unique surprises and is populated with such amusing and terrifying characters as the Five Gnomes of the Senses, the Winged Ones, and the Lord of the Dead. This game is so detailed, it's quite possible for you to come to the end without seeing or solving everything. The first sports simulator is *Front Page Sports: Football*, a fantasy-come-true for every sports enthusiast who desires authentic football realism. And it has something to offer every level of computer jock from the very casual to the advanced.

Options range from the ability to choose commands and watch the action to the more expert levels where you can design your own specialized plays, trade players, draft rookies, break tackles, kick, punt, or dive for interceptions or catches. One of the best features of the game is the *play editor* which allows you to design custom plays as well as modify over 200 stock plays that come with the game.

You can play as quarterback, coach, or general manager. Plus you can participate in the action on the field by controlling an individual player and change plays using audibles.

Front Page Sports: Football gives you the thrill of the unexpected. The home team in Seattle might have the advantage due to the fans' unrestrained exuberance. A game in Green Bay in December might get snow. Long passes or punts will be affected by the wind in San Francisco. And you'll have to deal with the differences of playing in natural turf and artificial turf stadiums.

The crowds will roar! This is hard-core football at its finest!
