SUBJECT CASE #41550

MESSAGE

FROM AGENT M-22

DATE 12/10

Chief:

Here is all I've been able to put together after a year of tracking the elusive his Sandiego. I hope it will help you and any Acme agent foolhardy enough to try and capture Carmen and her minions.

I've included sketches and as much personal data as I could find on a bunch of unsavory characters who are well known associates of the suspect. During my travels I have also compiled a set of notes on the cities in Europe I believe are key targets for Carmen and her gang. The information on these locations is important, so be sure to read them carefully.

While Carmen is too clever to follow a set pattern when looting a continent, I think the map I drew will be of some help in at least narrowing the scope of your investigations.

Well, Chief, that's about it. I know it's no longer a matter of if she will strike, but where and how soon!
