Create A New Nation

TECHNICAL SUPPLEMENT

HARDWARE & SYSTEM REQUIREMENTS

To play Colonization, your computer must have:

- a 386SX processor or better (For best play, we recommend at least a full 386 with a system speed of 33Mhz or more),
- at least 575,000 bytes (approx. 565 Kb) of free conventional memory,
- VGA graphics or better, and
- DOS version 5.0 or higher.

For ease of play and convenience, we strongly recommend that your computer system include a mouse.

SOFTWARE COMPATIBILITY ISSUES

Please note that this list includes only the known conflicts and incompatibilities. Since no test procedure can ever be totally comprehensive, you may run into undiscovered problems. Please consult with Customer Service if you do.

This game has not been tested under Microsoft Windows; therefore we suggest you do not use it with Windows. Chances are very good that the two will not work together.

We strongly recommend that you not have any Terminate-and-Stay-Resident programs (TSRs) other than disk caching programs (SMARTDRV, for example) loaded into memory when playing Colonization. Not only will they decrease the amount of free memory available, thus slowing the game, but there may be unpredictable interactions.

INSTALLATION

To install Colonization on your hard disk:

- Place Disk #1 in an empty disk drive.
- Make that drive the current drive. (Type the letter of that drive (usually A or B), followed by a colon, then press [Enter].)
- Type the word install and press [Enter].
- Follow the on-screen instructions.
- If you do not know the correct settings for your sound card (IRQ and such), please refer to the documentation that came with the card.

Once the automated installation and set-up are complete, the game is ready to play. Type colonize and press [Enter] to start the game.

KEYBOARD CONTROLS

All the features of Colonization are available through keyboard control except Trade Routes. If you do not have a mouse attached to your system, or if you prefer using the keyboard, the control system described here is for you.

THE MAP

All the commands available on the map are included in the pull-down menus at the top of the screen. To open one of these menus, hold down [Alt] and press the letter that is highlighted in the menu name. (For example, to open the game menu, you would press [Alt]{G})

Once the menu is open, there are two ways to select one of the listed features. You can use the arrow keys to scroll the highlight bar to the feature you want, then press [Enter] to select it. If there is a shortcut key (a "hot key") listed alongside the feature, you can simply press that key instead.

Advisers Shortcuts

Rather than going through the menu, you can consult your advisers at any time (even when not on the map) using the following shortcuts:

Religious Adviser	[F2]	Colony Adviser	[F6]
Continental Congress Adviser	[F3]	Naval Adviser	[F7]
Labor Adviser	[F4]	Foreign Affairs Adviser	[F8]
